

JOCSAN BARQUERO CHAVES

ADVANCED STUDENT OF
COMPUTER ENGINEERING

PERSONAL SUMMARY

I am an advanced student of computer engineering at the Latin American University of Science and Technology (ULACIT), I am a very committed person and a lover of computer science. I am passionate about the field of software development, where my main hobbies are website design and creation. My skills are mainly aimed at the Front-end field of web development. I am characterized by good performance and teamwork communication.

Right now I am looking for work in order to add experience to my studies in the computer science area, I have only worked as a sales consultant, however I adapt quickly to any work environment. I am also used to working on projects, because in the university I am in, the evaluations are based on it.
